## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in United Kingdom on 04/17/00. It is noted, however, that applicant has not filed a certified copy of the foreign application as required by 35 U.S.C. 119(b).

### ***Claim Objections***

2. Claims 7-13, 20-25, 27 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim, i.e. claims 5, 18, can not serve as a basis for any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 7-13, 20-25, 27 not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 2634

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. **Claims 1, 14, 26** are rejected under 35 U.S.C. 102(e) as being anticipated by Rinne (US 5,987,063).

**Regarding claim 1**, Rinne discloses the claimed subject matter in claim 1 including "performing a separate Fourier Transform on the sampled signal, the separate Fourier Transform being a partial and/or reduced Fourier Transform to derive phase values for at least two points thereof, and compensating for the sampling frequency offset in dependence on the phase values" in Figure 3, elements 2, 5; col. 5, lines 11-50.

**Regarding claims 14, 26**, see claim 1 above and further in col. 2, line 63 to col. 5, line 11.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. **Claims 2-13, 15-25, 27** are rejected under 35 U.S.C. 103(a) as being unpatentable over Rinne in view of Stott et al. (US 6,628,730) (hereafter Stott).

Art Unit: 2634

**Regarding claims 2-13, 15-25, 27**, giving the conventional make-up of the OFDM system, i.e. see Stott, such claimed subject matter in claims 2-13, 15-25, 27 would have been obvious to one skilled in the art based on Rinne.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Armbruster et al. (US 6,304,545) disclose Method And Circuit Arrangement For The Correction Of Phase And/Or Frequency Errors In Digital MultiCarrier Signals.
